

FuelTracker dev diary

Proposed

Missing products comparison

- Generate a table of “all products” for all stations.
- Compare “today's” products against that master list to see what is not available today.
- Age out as needed(?).
- Remove old stations.

Processes

Compare DEV to PROD database

Export database schemas (no data):

```
docker exec -it FW_PostgreSQL /bin/bash
pg_dump -Cs fuelwatcher > /workspace/FuelWatcher/bak/fuelwatcher_RPi64_`date
+%Y-%m-%dT%H-%M-%S`.bak
pg_dump -Cs fuelwatcher >
/workspace/FuelWatcher/backups/fuelwatcher_STONARD_`date +%Y-%m-%dT%H-%M-
%S`.bak
```

Compare exports (Beyond Compare): RPi / **backups** ↔ **bak**
